Congressman Joseph Addabbo  
2365 Rayburn House Office Building  
Washington, D.C. 20515

Subject: Central Intelligence Agency RFP-83A-160

Dear Congressman Addabbo:

Spacesaver Systems is a small business vendor of high density mobile storage systems. We would appreciate your assistance in securing information concerning the award of the subject RFP.

In February, 1983, we were invited to submit a proposal along with several other firms. After several meetings and amendments to the original specifications, proposals were submitted by four interested vendors.

There were three parts of the specifications in particular which cause us concern:

## SPACESAVER SYSTEMS, INC.

After proposals were submitted by four vendors, specifications were amended from those which Spacesaver Systems had responded to without any exceptions. We are concerned that specifications were altered to accommodate the abilities and inadequacies of the successful bidder, Remco.

We need the answers to the following questions to determine if specifications were altered by amendments #6 and #7 to protect the ability of Remco, the successful vendor.

STAT

We have filed two protests with the General Accounting Office. One challenges Remco's ability to satisfy all final specifications. The other questions the ability of the C.I.A. to solicit and award the contract to firms other than small business concerns. Three of the four bidders (all except Remco) are small business concerns. We feel this award should be made under the mandatory small business set aside of the Federal Supply Schedule, FSC Group 71, Part III, Section J.

Thank you for your interest and assistance.

Very truly yours,

STAT
